12. Future Work

Introduction

- Helping students and job seekers find valuable, real-world internship experiences
- Bridging the gap between emerging talent and companies in need of fresh perspectives..
- Making the internship search and hiring process easy, efficient, and impactful for everyone.

Problem Statement

- Job seekers often find it hard to discover good internships because information is scattered and hard to find.
- At the same time, companies have trouble finding the right Job seekers and managing many applications.
- No single platform connects students and recruiters effectively for internships

Proposed Solution

- **Build a centralized, user-friendly platform that aggregates all internship listings in one place.**
- **Provide companies with an intuitive dashboard to post jobs, track applications, and manage candidates easily.**
- **Streamline the entire connection process to speed up hiring and simplify communication between interns and companies.**

Aim/ Objectives

Aim

- Develop an easy to use web platform that connects job seekers with internships and helps employers find and shortlist the right candidates.

Objectives

- To create a centralized internship platform for job seekers and companies.
- To allow job seekers to apply, track, and manage applications easily.
- To enable companies to post internships and manage applications effectively.

Functional Requirements

- User Registration & Login
- Profile Management
- Post & Browse Internships
- Internship Details & Application
- Manage Postings
- Application Tracking
- Bookmark & Reminders
- Notifications
- Admin Controls

Non Functional Requirements

- **Performance**
- **Security**
- **Usability**
- **Scalability**

System Design Diagrams

- **ER Diagram**
- **Class Diagram**
- **Use Case Diagram**

ER Diagram

Use Case Diagram

Work Plan

Task	Week														
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Identify Topic and Gathering Requirements															
Requirements Analysis & specification															
User Interfaces, Database design															
Implementation and unit Testing															
Integration and System Testing															
Operation and Maintenance															
Documentation															

Individual Contribution

S.KAVISHEAK - UWU/CST/22/065

- Design and developed the company interface.
- Implemented Internship Posting and Browsing .
- Developed backend for companies to manage postings.
- Designed database.

K.V.P.N.MADHAWA - UWU/CST/22/033

- Developed Admin Controls for monitoring and user management.
- Helped with notifications and reminders feature.
- Created ER diagram, Class Diagram.
- Documentation

Individual Contribution

T.V.A.K.R.PREMARATHNA - UWU/CST/22/052

- Designed and implemented UI for job seekers.
- Use case Diagram.
- Documentation.
- Contributed to ER diagram .

R.M.K.G.D.S.N.RATHNAYAKE - UWU/CST/22/062

- Built User Registration & Login system.
- Documentation
- Implemented Profile Management.
- Contributed to use case diagram .

Project Current Progress

Functionality (student)	Front end completed percentage	Backend completed percentage
User Registration and Login	100%	100%
Internship Browsing	100%	-
Profile Management	100%	-
View Internship Details	100%	-
Apply for Internships	100%	-
Save Bookmarks	100%	-
Track Application Status	100%	-
Notification Alert	100%	-

Project Current Progress

Functionality (company)	Front end completed percentage	Backend completed percentage
Company Registration and Login	100%	100%
Post Internships	100%	100%
Company Profile Management	100%	100%
Manage Postings	100%	90%
Receive Applications	100%	-
Update Application Status	100%	-

Project Current Progress

Functionality (admin)	Front end completed percentage	Backend completed percentage
Manage Users	100%	-
Track Activities	100%	-
Content Management	100%	-

Nun Functional Requirements

Performance	80%
Security	40%
UserFriendly	90%
Scalability	10%

Demonstration

Future Works

- Completing Backend Development
- Configuring Page Functionality and User Interaction
- Optimizing Website Performance
- Implementing Security Features
- Organizing and Documentation Source Code
